

I've been a subscriber to XM radio since Feb. 2002 and can say that it is the best radio I've ever had. As an over the road trucker the local traffic and weather channels are the easiest way for me to get local info for the areas I'm either in or traveling to. Trying to sift through 10 or 20 radio stations looking for that information is frustrating, time consuming, and in some cases unsafe driving because of the time it takes for me to hunt through the stations and the programming I don't want. Please allow XM and Sirius to continue to offer this type of programming.
